Project

E-COMMERCE ([see demo](#)) (Css, Js)   December 2023

In this project, we can view and save the list of products, evaluate them, search for necessary products, display discounted prices, and add them to the shopping cart.

Fast-food website ([see demo](#)) (React.js, scss, axios, zustand)   February 2024
Here you can see the list of dishes, prices and discount prices, search for the desired dish, select the necessary items for yourself, and read customer recommendations.

Admin panel ([see demo](#)) (React.js, js, flowbite-react)   January March 2024
In this admin panel, we can add, edit, delete, and search for teachers and students.
